MICHAEL R. STYLER  
Executive Director

JOHN R. BAZA  
Division Director

**Inspection Report**  
**Minerals Regulatory Program**  
July 17, 2007

Supervisor DRH

**Mine Name:** Cherry Hill Park Quarry  
**Operator Name:** Emery Industrial Resources

**Permit number:** M/049/021  
**Inspection Date:** July 17, 2007  
**Time:** 11:30 am

**Inspector(s):** Steve Demczak, Dan Smith, Lynn Kunzler, DOGM

**Other Participants:** None

**Mine Status:** Inactive, Partially Reclaimed

Elements of Inspection	Evaluated	Comment	Enforcement
1. Permits, Revisions, Transfer, Bonds	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
2. Public Safety (shafts, adits, trash, signs, highwalls)	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
3. Protection of Drainages / Erosion Control	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
4. Deleterious Material	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
5. Roads (maintenance, surfacing, dust control, safety)	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
6. Concurrent Reclamation	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
7. Backfilling/Grading (trenches, pits, roads, highwalls,	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
8. Soils	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
9. Revegetation	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

**Purpose of Inspection:**

Routine inspection while in the area.

**Inspection Summary:**

This has been inactive for the last 3 years, when about 1/2 of the site was reclaimed (note, the Board of Oil, Gas and Mining revoked the permit for this site and ordered reclamation.). The thistle problem noted during past inspections is under control, with very few plants being observed. The area to the north that had been regraded, had topsoil or compost applied and seeded, looked good with about 50% ground cover of desirable species. Species observed included sagebrush, basin wildrye, Russian wildrye, crested wheatgrass, western wheatgrass, Indian ricegrass, orchard grass, squirrel tail, thickspike wheatgrass and small burnet. The recreated drainage has been functioning and showed evidence of past flows. Areas that had been regarded and did not have topsoil or compost had poor vegetation establishment other than weedy species such as lamb's ear and Russian thistle. . Reclamation still needs to be completed on about half of the area. This will include reducing highwall / cut banks (about 6 feet high), regarding the remaining overburden,(most of the overburden has been used in either regarding or removed from the site). Apply composted manure and seeding. inactive. The access is gated and locked.

**Conclusions and Recommendations:**

Reclamation of this site should be completed this year.

**Inspector's Signature** JKL
